

## Biology (56)

Std. XI and XII

### Introduction

Higher secondary is the most crucial stage of education because at this juncture specialized disciplines of science are introduced. The present syllabus reinforces the concepts introduced in lower classes. Recently, the science of biology has undergone a paradigm shift that has transformed it from a collection of loosely related facts into a modern applied science.

Living organisms exhibit extremely complex functional system. Organisms seldom occur as isolated individuals. They are organized into populations and biological communities. Organisms, communities, ecosystems and environment constitute unique set of natural resources of great importance.

Knowledge of biology helps us to understand a common thread which holds all these components together. Understanding of biology will help in the sustainable development of the environment and will also ensure the existence of earth with all its amazing diversity.

This syllabus is designed to prepare students for various examinations conducted at state and national level. Hence it has been prepared in accordance with the guidelines shown in the final version of common core syllabi of COBSE, Delhi. Accordingly some additional topics from state Board syllabus have been deleted whereas the lacking topics have been added. The entire unit “Ecology and Environment” has now been added under Botany and Zoology sections.

### Objectives

The prescribed syllabus is expected to

- Promote the inherent skill of observation.
- Assist to understand the underlying principles of biological sciences and thereby develop scientific attitude towards biological phenomena.
- Help students to understand the functioning of organisms.
- Make students aware of issues of global importance.
- Guide students to perform easy experiments for better understanding of biological principles and to develop experimental skills required in practical work.
- Create awareness about the contribution of biology to human welfare.

Std. – XI

### Section I - Botany

#### Unit 1 Diversity in Living World:

##### Chapter 1- Diversity in organisms :

1. Diversity in living organisms-Brief idea.
2. Systematic and binomial system of nomenclature - meaning of the terms taxonomy, systematics, classification and nomenclature, Need of classification.

##### **Three domains of life, Concept of species.**

Taxonomic hierarchy with examples.  
Binomial nomenclature explanation, significance and examples.

- Classification of living organisms (five Kingdom classification) – Major groups and principles of classification for each Kingdom with examples.
- Lichens - Meaning, characters, examples and importance.
- Viruses and viroids - Definitions, characters, types with examples, Economic importance and list of viral diseases.

#### **Chapter 2 - Kingdom Plantae :**

- Salient features of major plant groups - Algae, Bryophyta, Pteridophyta, Gymnosperms and Angiosperms (Dicotyledons and Monocotyledons). Three to five salient features and two examples of each category.
- Botanical gardens and herbaria - Meaning, importance and list of gardens and herbaria in India.

#### **Unit 2 Structure and function of cell :**

##### **Chapter 3 - Biochemistry of cell :**

- Basic chemical constituents of living bodies.
- Structure and function of carbohydrates, proteins, lipids and nucleic acids in brief.
- Enzymes - Definition, **Types**, general properties, **Enzyme action** and factors affecting enzyme activity in brief.

##### **Chapter 4 Cell Division :**

- Cell cycle
- Mitosis
- Meiosis

#### **Unit 3 Structural organization in plants**

##### **Chapter 5 - Morphology of Plants :**

- Morphology, anatomy and functions of different parts - Root, stem, leaf, inflorescence, flower, fruit and seed. **(To be dealt along with the relevant practicals of the practical syllabus)**
- Plant tissues.

#### **Unit 4 Plant Physiology**

##### **Chapter 6 - Plant Water Relations and Mineral Nutrition :**

- Movement of water, food, nutrients and gases - Absorption of water and minerals, **Apoplast and Symplast Pathways**. Active and passive absorption in brief.

##### **2. Guttation**

Ascent of sap, **root pressure concept** and cohesion - tension theory.

Translocation of sugars **through phloem** brief account.

Transpiration – structure of stomata, mechanism of **opening and closing of stomata, Role of K<sup>+</sup> ions**

- Role of water and minerals - macronutrients and micronutrients and their role. **Mineral deficiency symptoms, Mineral toxicity, Elementary idea of Hydroponics, Nitrogen Metabolism (nitrogen cycle, biological nitrogen fixation)**

##### **Chapter 7 - Plant Growth and Development: Seed dormancy**

Germination - Hypogeal, epigeal and viviparous.

Definition and characteristics of growth.

Phases of growth, **Conditions of growth, Differentiation, de- differentiation, redifferentiation**

Sequence of developmental process in a plant cell

Growth regulators - auxins, gibberellins, cytokinines, ethylene and abscisic acid (role in brief) Photoperiodism, **Photomorphogenesis including brief account of Phytochromes (Elementary idea)**

Vernalization.

## Std. - XI

### Section II – Zoology

#### Unit 1 Diversity in Living World

##### Chapter 8 - Kingdom Animalia

- Salient features of major phyla under kingdom Animalia. Classification of following phyla with three to five salient features and two examples of each category: Porifera, co elenterata ctenophora, Platyhelminthes, Nemathelminthes, Annelida, Arthropoda, Mollusca, Echinodermata and Hemichordata. Classification of phylum chordata upto class level with three to five salient features and two examples of each category: Urochordata, Cephalochordata, Cyclostomata, Chondrichthyes, Osteichthyes, Amphibia, Reptilia, Aves and Mammalia.
- Zoological parks and Museums - General idea with list.

#### Unit 2 Structure and function of cell

##### Chapter 9 - Organization of Cell

- Cell theory - brief account
- Prokaryotic and eukaryotic cell - structure and examples.
- Plant cell and animal cell.
- Nuclear organization - Nucleus, nucleolus and nucleoplasm.
- Cell wall and cell membrane - (fluid mosaic model).
- Cell organelles: Plastids, Mitochondria, Golgi complex, Lysosomes, Endoplasmic reticulum, Vacuoles, Ribosome and Centrioles (**ultrstructure and functions**). Microbodies, cytoskeleton, cilia and flagella.

#### Unit 3 Structural organization in Animals:

##### Chapter 10- Study of Animal Tissues :

###### 1. Animal tissues - types

- Epithelial tissues - simple epithelium (squamous, cuboidal, columnar, Ciliated, glandular). - compound epithelium (stratified).
- Connective tissue - (Areolar, Adipose, Tendons, Ligaments, Cartilage and Bone).
- Muscular tissue - (Smooth, striated and cardiac).
- Nervous tissue (Neurons, glial cells and types of neurons).

##### Chapter 11- Study of Animal Type

- Morphology, anatomy and functions of digestive, **circulatory, respiratory, nervous, and reproductive** systems of cockroach (**Brief account only**)

#### Unit 4 Human Physiology

##### Chapter 12- Human Nutrition

- Digestive system in brief
- Physiology of digestion, **gastrointestinal hormones, Peristalsis. Calorific value of proteins, carbohydrates and fats**
- Absorption, assimilation **and egestion**
- Nutritional and digestive disorders – PEM, indigestion, constipation, Jaundice, **vomiting and diarrhoea**

##### Chapter 13- Human Respiration

###### Respiratory organs in animals (Recall only)

- Respiratory system in brief
- Breathing- inspiration and expiration.
- Exchange of gases, transport of CO<sub>2</sub> and O<sub>2</sub> and tissue respiration.

###### Regulation of Respiration, Respiratory volumes.

- iv) Respiratory disorders- Asthma, **Emphysema** and occupational lung diseases.

#### Chapter 14 - Human skeleton and Locomotion:

Brief account of human skeleton:

A] Axial Skeleton

B] Appendicular Skeleton

(Details to be dealt with the relevant practical)

Types of joints - synarthroses, amphiarthroses, and diarthroses.

Types of diarthroses - ball and socket, hinge, condyloid, pivot, saddle and gliding joints.

Types of Movement- Ciliary, Flagellar, Muscular

Mechanism of muscle movement: **Contractile proteins and Muscle contraction.** Skeletal and muscular disorders – **Myasthenia gravis**, Osteoporosis, arthritis, muscular dystrophy tetany and **gout**.

#### Std. XI - Biology Practicals Syllabus

##### (A) List of experiments:

1. Study of parts of compound microscope.
2. **Preparation of T. S. of dicot (sunflower) and monocot roots and stem** to study different plant tissues.
3. Study and describe three locally available flowering plants from the families- Solanaceae, Fabaceae and Liliaceae with respect to types of root-(tap and adventitious), stem (herbaceous and woody), leaf (arrangement, shape, venation, simple and compound) and floral characters.

4. Study of plasmolysis in epidermal peels.
5. Study of osmosis by Potato osmometer
6. Study of structure and distribution of stomata in upper and lower surface of leaf.
7. To test the presence of sugar, starch, proteins and fats from suitable plant and animal materials.
8. To study the digestion of starch by salivary amylase under different conditions of temperature and pH.

##### (B) Study/ Observation of the following (Spotting):

1. Study of specimens and identification with reasons:  
**Bacteria, Amoeba, Oscillatoria, Spirogyra, Rhizopus, yeast, Agaricus, Usnea, Riccia, Funaria, Nephrolepis, Cycas, sunflower and maize.**
2. Comparative study of rates of transpiration in upper and lower surface of leaf.
3. Study of different modifications of root (fusiform root, parasitic root, epiphytic root and pneumatophores).
4. Study of different modifications of stem (stem tuber, runner, and tendril).
5. Study of different modifications of leaf (leaflet and stipular tendril), leaf Spines, phyllode).
- 6.. Study of imbibition of seeds/raisins.
7. Study and identification of different types of inflorescence.
8. **Study of tissues and diversity in shapes and sizes of plant and animal cells- palisade cells, guard cells, parenchyma, collenchyma, sclerenchyma, xylem, phloem, squamous epithelium, muscle fibres, mammalian blood smear, through temporary or permanent slides.**

9. Observation and comments on experimental set up on:
  - a) Phototropism
  - b) Suction due to transpiration.
  - c) Apical bud removal
10. Study of specimens and their identification with reasons – *Sycon*, *Hydra*, Pleurobrachia, Liverfluke, *Ascaris*, Leech, Earthworm, **Prawn, Silkworm, Honey bee**, Snail, Star-fish, *Balanoglossus*, Shark, Rohu, Frog, Lizard, Pigeon and Rat.
11. Study of human skeleton (except skull, hand bones and foot bones) and **different types of joints (synovial, cartilaginous and fibrous joints with one suitable example)**.
12. Study of external morphology of earthworm, cockroach and frog through models.
13. **Study of mitosis** in onion root tips and animal cells (**grasshopper**) from permanent slides.

## Std. - XII Biology

### Section I – BOTANY

#### Unit 1: Genetics and Evolution :

##### Chapter 1 - Genetic Basis of Inheritance:

Mendelian inheritance. Deviations from Mendelian ratio (gene interaction-incomplete dominance, co-dominance, multiple alleles **and Inheritance of blood groups**), **Pleiotropy, Elementary idea of polygenic inheritance.**

##### Chapter 2 - Gene: its nature, expression and regulation:

Modern concept of gene in brief-cistron, muton and recon. **DNA as genetic**

**material**, structure of DNA as given by Watson and Crick's model, **DNA Packaging**, semi conservative replication of eukaryotic DNA.

RNA: General structure, types and functions.

Protein Synthesis; central dogma, Transcription; Translation-Genetic Code, Gene Expression and Gene Regulation (The *Lac* operon as a typical model of gene regulation).

#### Unit 2: Biotechnology and its application:

##### Chapter 3 - Biotechnology: Process and Application :

Genetic engineering (Recombinant DNA technology):

Transposons, Plasmids, Bacteriophages; Producing Restriction Fragments, Preparing and cloning a DNA Library, Gene Amplification (PCR).

Application of Biotechnology in Agriculture – BT crops

Biosafety Issues (Biopiracy and patents)

#### Unit 3: Biology and Human Welfare :

##### Chapter 4 - Enhancement in Food Production

Plant Breeding

Tissue Culture: Concept of Cellular Totipotency,

Requirements of Tissue Culture (in brief), Callus Culture, Suspension Culture.

Single Cell Protein. **Biofortification.**

##### Chapter 5 - Microbes in Human Welfare:

Microbes in Household food processing.

Microbes in Industrial Production.

Microbes in Sewage Treatment.

Microbes in Biogas (energy) Production.

Microbes as Biocontrol Agents.

Microbes as Biofertilizers.
